TECHNICAL SKILLS

Languages: Java, C++, Python, SQL, JavaScript, Bash, ARM Assembly, HTML/CSS

Cloud & DevOps: AWS (EC2, S3, Lambda, IAM, CloudWatch, DynamoDB, CloudFormation), Git, GitHub, GitHub Actions, CI/CD, Linux

Frameworks & Tools: REST APIs, Node.js, OOP, Data Structures & Algorithms, STL, Infrastructure as Code (IaC), Agile/Scrum

Testing & Software: JUnit, Unit Testing, VS Code, IntelliJ, Postman, Digital Logic Design, ARM Cortex-M

EDUCATION

The University of Texas at Dallas — Richardson, TX

Expected May 2028

Bachelor of Science in Computer Engineering

Relevant Coursework: Data Structures, Computer Science II (Java), Digital Logic Design, Calculus I

Collin College — Plano, TX

December 2025

Associate of Science in Computer Science

PROJECTS

AWS Serverless File Pipeline | *AWS Lambda, S3, DynamoDB, CloudFormation, CloudWatch, Python2026*

- Architected event-driven pipeline triggering Lambda on S3 uploads to write structured file metadata to DynamoDB in under 2 seconds.
- Defined infrastructure as code (IaC) using AWS CloudFormation, enabling reproducible single-command deployments across environments.
- Configured least-privilege IAM roles across 4 AWS services and CloudWatch alarms for end-to-end observability and secure cloud access.

Task Manager CLI | *Java, PriorityQueue, JUnit, GitHub Actions, File I/O*

2026

- Engineered Java CLI using PriorityQueue and custom Comparable implementation to auto-surface top-priority tasks among 50+ concurrent entries.
- Authored CI workflow with GitHub Actions to automatically run JUnit unit tests on every push, catching regressions before merge.
- Built persistent storage with BufferedReader and PrintWriter, enabling zero-data-loss recovery across restarts.

Bank Account System | *C++, Inheritance, Polymorphism, STL*

2025

- Developed C++ banking simulation using inheritance and polymorphism across a BankAccount base class and Checking/Savings derived types.
- Implemented overdraft protection, withdrawal limits, interest accrual, and STL vector-backed transaction log across account operations.

Student Grade Tracker | *C++, OOP, STL, File I/O*

2025

- Built CLI application managing student course records on a 4.0 GPA scale with grade-to-letter conversion and file I/O persistence across sessions.

WORK EXPERIENCE

Target — Expert Fulfillment Associate

June 2024 – Present

Fortune 50 retail corporation with 1,900+ stores nationwide and \$107B annual revenue.

- Fulfilled 100+ digital orders per shift at 98%+ accuracy, consistently meeting same-day delivery and pickup SLAs.
- Optimized backroom inventory workflows across 200+ SKUs, accelerating floor replenishment speed by 20%.
- Resolved 20–30 customer inquiries per shift regarding orders, returns, and product locations with zero escalations.

Best Buy — Retail Sales Specialist

Aug 2021 – May 2024

Fortune 100 consumer technology retailer specializing in computers, mobile, and smart home products.

- Advised 15–25 customers daily across 5+ technology categories including computers, mobile devices, and smart home hardware.
- Drove 20%+ attachment rate on accessories and protection plans through targeted product demonstrations and consultative selling.
- Achieved top-quartile customer satisfaction scores by resolving post-purchase concerns with technical accuracy.

H&M — Sales Associate

Sep 2018 – Feb 2020

Global fashion retailer with 4,000+ stores across 75 markets.

- Processed 50–80 transactions per shift with zero cash-handling errors across cash and card payment systems.
- Delivered personalized service to 30+ customers daily and executed visual merchandising across 3–5 floor sections per shift.

VOLUNTEER EXPERIENCE

Islamic Association of Collin County — Volunteer

May 2021 – Present

- Contributed to 10+ community events and outreach programs annually, demonstrating consistent service and teamwork.
